HemoScreen streamlines oncology workflows by providing absolute neutrophil count (ANC) results in minutes, eliminating delays associated with off-site lab processing.

With immediate, lab-accurate results at the point of care, providers can make faster treatment decisions, reducing patient wait times and optimizing care for immunocompromised patients.

- Portable, plug-and-play, and start up within seconds
- Lab-accurate 5-part diff and 20 CBC parameters results in 5 minutes
- NO maintenance, NO calibration, and NO external reagents required
- 3 Simple & Easy steps, using a drop of venous or capillary blood

Effortless Operation, Maximum Efficiency

Designed for oncology clinics and infusion centers, HemoScreen requires no daily maintenance, external reagents, or calibration.

Its compact footprint and intuitive 3-step operation free up staff time while ensuring reliable results with minimal effort. By bringing CBC testing closer to the patient, HemoScreen enhances efficiency, improves workflow, and supports timely, personalized treatment.

This seamless integration into oncology care helps reduce patient stress and enables more proactive management of chemotherapy schedules, minimizing unnecessary delays and hospital visits.
